APRIL, 2026

Dear Customers,

As a result of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the Conflict Minerals rules adopted by the U.S. Securities and Exchange Commission (the "SEC"), many companies and their supply base are required to make disclosures regarding whether "conflict minerals" used to manufacture their products originated in the Democratic Republic of Congo ("DRC") or the adjoining countries ("Covered Countries"). These "conflict minerals" consist of columbite-tantalite, cassiterite, gold, wolframite, or their derivatives, which include tantalum, tin, gold, and tungsten (collectively, "Conflict Minerals").

Roopam Steel has performed a reasonable inquiry investigation into our supply base and has determined that material manufactured on and after March 31, 2013, is "DRC Conflict Free" as defined by the applicable SEC rules.

Based on the alloy purchased and supplied, one or more of the following applies:

- The materials supplied by **Roopam Steel** do not contain or utilize tantalum, tin, tungsten, and gold.
- The materials supplied by **Roopam Steel** that contain or utilize any Conflict Minerals do not originate from any of the Covered Countries.
- The materials supplied by **Roopam Steel** that contain or utilize any Conflict Minerals are from recycled or scrap sources, for which the original country of origin cannot be determined.

The "Covered Countries" include the Democratic Republic of Congo (DRC) and adjoining countries: Angola, Burundi, Central African Republic, the Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda, and Zambia.

Thank you, and we look forward to continued business with you.

Regards,

Mr. Mohanlal Shah
